X_RAY FILM IMAGES AND DOCUMENT FILE IMAGES

e-WIX is an ASP Service that converts, hosts, manages, and delivers your critical X-Ray and paper files electronically, upon request, to your desktop workstation. As incredible as it may sound, NCD offers a service that converts your hardcopy information to electronic images (DICOM, TIFF, PDF), hosts this data on a highly secure site and allows you password protected access , anytime from an authorized workstation.

The e-WIX service meets HIPAA compliance regulations and can be deployed in a few hours or less. NCD developed the access and management software so that training is not necessary.

You can use e-WIX as a PACS alternative, a document management solution or a simple archive service. There is no capital expenditure. Monthly service charges are based on the number of workstations licensed to access information and the amount of disk storage space used each month. We capture DICOM images, digitize X-Ray film, scan paper documents, and set up electronic and hardcopy information delivery.

What do you have to do? Give us your documents and you will be able to access it shortly thereafter. We do everything else. You pay a small monthly service fee. It's simple, fast, secure, and inexpensive. View an online demo at www.e-wix.com.
