

## **e-WIX Document Services**

e-WIX is a web-based document repository service helping organizations automate their business processes by converting paper files to electronic files and hosting them, thereby eliminating filing, photocopying, distribution and searching for hardcopy files. This Application Service Provider (ASP) enables subscribers to convert, publish, store and access document information via the NCD hosted e-WIX service. The e-WIX service improves labor efficiency, productivity, disaster recovery and is a great alternative to microfilming and record storage.

NCD provides free document scanning to its subscribers, further reducing the initial cost to deploy. Users gain access to document images at any web-enabled workstation in conjunction with authorized access codes provided by NCD.

Organizations wishing to archive paper based information electronically can do so without any investment in scanners, storage devices, network expansion and associated hardware nor do they need to purchase document management software, plug in viewers or high volume storage management software. e-WIX incorporates the latest technology to deliver instant access, unlimited capacity and simple user friendly operation. Subscriber pays a small monthly fee for access and storage.

## **e-WIX Medical / X-Ray Services**

NCD now offers medical facilities a service to transfer, host, manage and make X-Ray images (DICOM images) available through its ASP repository service e-WIX. NCD's service has been operating as a document image repository for the past five years and now provides capability to host and access X-Ray images as well as document images from any authorized web enabled workstation. This move is very timely because medical facilities are trying to eliminate or minimize the use of X-Ray film. Picture Archiving and Communications Systems (PACS) are difficult to deploy and expensive to procure. e-WIX represents a low cost, easy to use and easy to deploy alternative. Doctors and other authorized personnel will be able to instantly access X-Ray images and/or medical records from their hospital, clinic, office and home.

## **Customer Benefits**

Although there are a limited number of web repository services today, none appear to combine the scanning/digitizing, managing and hosting service as simple as e-WIX. This combination provides a turnkey solution with almost no front end costs, making it extremely easy to begin with no risk.

Customers have found that e-WIX eliminates costly filing and re-filing, file hunting, distribution and photocopying or excessive file cabinet space. e-WIX is a simple, reliable and proven method of easily accessing and archiving files such as; invoices, purchase orders, proof of delivery, Q. A. documents, bill of lading, H. R. files, medical records, X-Rays and shipping & receiving documents to name a few.

## **About National Consulting and Development Corporation**

NCD was established in 1987 and has been involved with imaging solutions and services since 1991. NCD developed its e-WIX service in 2000. Its data center is located in Northern Ohio and its co-location site is in Troy, Michigan. NCD also provides document conversion, X-Ray film digitizing and consulting services.
